projects

Skill Tracking - DXC.CDG Technology Morocco
Implemented a skill-tracking system allowing users to add, view, update, and delete skills categorized by type (e.g., Frontend, Backend, Database), also add what prejects they're working for using .NET Web API and Angular

Survey - ReactJs - JobInTech project
Create an interactive platform: The main objective is to develop a web application where users can interact with surveys in a dynamic way.

Portfolio - ReactJs+Vite/TailwindCSS
Create a portfolio website using ReactJs, Vite and TailwindCSS. It serves as a platform to present myself, share my projects and provide information about my training and internship.

School management system - JobInTech project
work in a team in a back-office department, using .NET and React, where everyone has their own tasks.

Travel Management - ReactJS+Vite/TailwindCss
Built platform enables societies to add their travel offers, allowing clients to easily search and explore travel options in one centralized interface.

Translate App - ReactJS+Vite/JSON/CSS
A simple web app that turns typed words into sign language emojis — letter by letter. Built to make learning sign language fun, accessible, and aesthetic.

Fitness Planner- ReactJS+Vite/Tailwin/
A sleek e-commerce landing page for a modern furniture store. Built with clean UI, smooth navigation, and a cozy aesthetic to match the brand vibe.
